

CGS the focal point of education

BARELY three years since it was set up, the Centre of Graduate Studies (CGS) of Universiti Malaysia Pahang (UMP) has established itself as the focal point of higher education excellence in the state.

The centre had enabled UMP to meet graduate educational needs in engineering and technology professions.

CGS prepares students to serve as professionals through its doctoral and master's programmes, collaborative learning models and continuing professional education.

It also supports professional and personal transformation through a learning model which integrates theory, research, and values with high integrity practice and scholarship in engineering, technology and creativity.

Its mission is to develop UMP and the surrounding community into an intellectual growth area by taking them to the highest level through research, creative activities and civic engagements.

It promotes the educational, cultural and economic development of Gambang, Kuantan and Pekan by offering

a doctoral and master's programme.

This is done through collaborations, partnerships and a commitment to multidisciplinary programmes.

Its mission is to inspire and work with students to develop and apply an engineering and technological method to confront industrial needs and challenges.

In the long term it aspires to distinguish itself as a diverse and socially-responsive learning community.

It is set to draw attention from the cultural, intellectual and economic resources of the state as its location on the East Coast Economic Region is to its programmes.

CGS values collegiality, co-operation, creativity, innovation and entrepreneurship as well as honesty, integrity and support for inquiry and dissemination of findings.

It plans to be internationally recognised as a graduate studies centre with a global perspective.

The faculty and graduate students are important parts of the team that provides opportunities from creative solutions to engineering and technological research and design problems.

UMP's Centre for Graduate Studies prepares students to serve as professionals through its doctoral and master's programmes, collaborative learning models and continuing professional education.
